ACADEMIC BACKGROUND

RMIT University
Master of Artificial Intelligence 2025-2028
Bachelor of Information Technology 2021-2024
GPA: 3.7/4.0

- **Scholar's List for Academic Excellence**: Top 5% of graduating students by GPA.
- Ranked **Top 10** among Bachelor of Information Technology graduates.

English Proficiency: IELTS 7.0
2nd Runner-Up, Neo League 2025: Competitive AI challenge hosted by RMIT's Neo Culture Technology Club open to all universities in Ho Chi Minh City with around 100 teams.

EXPERIENCES

September 2025 – Present **Talentnet**
AI Engineer Specialist

- Design and build AI tools and automation that boost productivity, cut manual work, and accelerate the company's digital transformation.

- **Document OCR (Solo Developer):** Built an end-to-end pipeline (preprocessing, extraction, post-processing, template filling) where users define schemas and rules to dynamically tailor the flow. Replaced manual insurance-document extraction using vision language models, reaching >98% accuracy and saving users >90% of processing time.

- **Data Validation:** In HR outsourcing payroll, each client has distinct rules and data formats. Used AI to convert client rules into code and read varied formats dynamically, automating payroll generation and replacing the manual checker step to greatly reduce manual work.

- **Payroll Chat bot – Legal RAG Assistant (Solo Developer):** Consultants must cite exact Vietnamese legal references – Điều, Khoản, Điểm – which traditional RAG cannot reliably do. Crawled regulations from official, audited Vietnamese legal sources and built a Tag Chunker that splits content by using tags, so each chunk retains full context and is never cut mid-paragraph. Users ask a question and the RAG agent returns the correct document with cite able references.

December 2023 – September 2025 **Garena - Free Fire**
Game Developer

- Developed 14 engaging game modes for Garena Free Fire Craftland.
- Two officially featured in the mode selection page, placed next to 2 official game modes.
- Achieved approximately 6.2 million positive interactions from players on the Vietnam server.
- Cross regional collaborations to deliver high-quality game play experiences tailored to diverse player bases.
